Professional Summary

Software Developer with experience in React.js, TypeScript, Node.js, Express.js, MongoDB, REST APIs, and microservices. Proven experience building analytics dashboards, SDK features, user engagement platforms, and full-stack web applications. Skilled in frontend development, backend services, performance optimization, and cloud deployment.

Experience

APXOR

Software Developer

Jan 2026 – Present

- Developed and maintained enterprise analytics products used by customers to monitor user engagement, campaign performance, and behavioral insights.
- Designed and enhanced backend services and microservice APIs powering analytics workflows, reporting pipelines, and customer-facing dashboard features.
- Improved application performance through code optimization, lazy loading, efficient state management, and frontend architecture improvements.
- Collaborated with product, QA, and engineering teams to deliver production-ready features, bug fixes, and platform enhancements across multiple releases.

Software Development Intern

Jul 2025 – Jan 2026

- Contributed to the development of Apxor's Web Engagement SDK enabling onboarding flows, walkthroughs, tooltips, nudges, and user interaction tracking.
- Investigated and resolved SDK-related production issues involving browser compatibility, event collection, and customer integrations.
- Assisted in developing new SDK capabilities and improving overall reliability, performance, and customer adoption.

Projects

Podcast Streaming Platform (MERN Stack)

- Built a MERN-based podcast platform supporting uploads, streaming, favorites, and content management.
- Implemented JWT authentication, RBAC, and 10+ REST APIs for secure user and podcast management.
- Integrated Cloudinary, Zustand, and TanStack Query for media storage and state management.
- Deployed backend on Railway and frontend on Vercel with production-ready configurations.

Analytics Dashboard & Engagement Platform (Apxor)

- Developed analytics dashboards for user engagement, campaign performance, and business metrics.
- Built 15+ reusable React.js and TypeScript components for reporting and data visualization.
- Optimized API integrations and large dataset rendering to improve dashboard responsiveness.

Web SDK, Session Replay & User Engagement Platform (Apxor)

- Implemented rrweb-based Session Replay for user journey analysis and issue investigation.
- Developed event tracking for clicks, page views, form interactions, and custom business events.
- Improved SDK reliability through performance optimization and browser compatibility fixes.

Education

Bachelor of Technology in Computer Science, KIET College

2020 - 2024

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Go, Python, SQL

Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI, Zustand, TanStack Query

Backend: Node.js, Express.js, REST APIs, Microservices, JWT Authentication

Databases: MongoDB, MongoDB Atlas, MySQL

Analytics & SDK: Analytics Dashboards, Web SDK Development, Session Replay, rrweb, Event Tracking, User Behavior Analytics, Browser APIs, Performance Optimization

Tools: Git, GitHub, Vite, Webpack, Chrome DevTools, Agile/Scrum
